Git Assignment

Ntumpha Mwanza

This is an important course in my PhD journey. When I enrolled in my PhD program, I had limited knowledge of the basic Computer Science publishing and development tools such as LaTex. I want to learn how to use LaTex, Git in detail. I want to learn how to read and write research papers in my area of interest. Am looking forward to learning and improving my presentation skills. I also want to learn how to use the cloud computing for research. My goal of taking this course is to successfully complete it with a grade of A and be able to start my PhD research. My other goal is to learn how to use and navigate Google.Scholar as a resource for my research papers.
